① Forest animals always have enough food.

3 Tourist littering is a big problem.

Trees compete for space to grow.

② Thinning of the understory often causes high-temperature fires.

Today, the first lesson of the day is mathematics. To practice numbers, the children visit the nearby water trough to look at animal tracks and count how many different animals came to drink during the night. Language, speech, and debate classes focus on conservation issues. A recent student debate centered on whether people should give water to animals in the wild.

natural environment," William said.

The idea for the school came from Sue Godding, who was the manager of a game lodge. She says that nature-based tourism is one of South Africa's national treasures. She believes that the country needs to produce people who understand the environment and the need to preserve it.
